

Introduces Auto View™

The purple area along side the truck depicts the normal area of coverage for a conventional mirror. The yellow area is the expanded vision area provided by LaneScan.

Auto View, the latest in technology from LaneScan, was developed to provide automated mirror control to aid drivers in reducing costly backing, lane change and merging accidents.

Quick Facts

- Auto View brings safe driving to a new level
- Auto View technology is integrated into the 5th wheel
- Auto View is available in right, left and dual scanning systems
- Auto View automatically tracks the turn angle of the tractor to the trailer
- Auto View automatically adjusts the side view mirrors enabling the driver to maintain a constant view of the entire side of his truck even on turns of 75 degrees or more (see yellow zone in the illustration at left)
- Auto View is designed to work on any length semi combination
- Auto View is especially useful in tight turns and backing situations
- Auto View allows the driver to keep both hands on the steering wheel while turning and backing
- Auto View allows the driver to use his mirror effectively without having to shift into uncomfortable positions
- Auto View like LaneScan's GO ZONE allows drivers to see objects that would normally remain hidden when using conventional mirror systems
- Auto View is an inexpensive and easily installed system for both new and existing trucks
- Auto View is automatic and easy to use so fleet managers are assured drivers will use the system thereby reducing accidents
- Auto View, like Go Zone, will help reduce tire and trailer damage costs having a direct, favorable impact on your companies' maintenance budget.

Is Your Fleet Lanescan Safe?

Presents **Go Zone™**

*Turn the No Zone into the Go Zone!
End Merging and Lane Change Accidents!*

Quick Facts

- Go Zone uses proven automated mirror technology
- Over 6,500 Go Zone systems are currently in use
- Go Zone is available in right, left and dual scanning systems for straight trucks and tractors
- Go Zone can eliminate costly lane change accidents by providing drivers with an instant and expanded view of adjacent lanes
- Go Zone allows drivers to use flat glass mirrors to view up to 6 adjacent lanes at the push of a button
- Go Zone allows drivers to merge into traffic easily and safely
- Go Zone automatically returns the mirrors to the driver's preferred preset driving position upon completion of the scan operation
- Go Zone can help eliminate tire sidewall and trailer damage often caused by the tires and trailers hitting unseen obstacles during turns and backing maneuvers
- Go Zone allows drivers to maintain a safe driving position while scanning traffic in merging situations
- Go Zone is **driver friendly**, easy to use and encourages proper mirror use
- Go Zone is an inexpensive and indispensable safety tool
- Go Zone is easy to install in new or used equipment
- Go Zone is virtually maintenance free
- Go Zone will help reduce accidents and maintenance costs and improve driver retention
- **98% of drivers surveyed say Go Zone makes driving safer and easier!**
